## 1 Introduction

This document is intended to show my favourite use of BibTeX in L<sup>A</sup>T<sub>E</sub>X (depending on the target) with a simple example. An example of a citation is the *C Programming Language Cheat Sheet* [1]. Also, I use the gcc C compiler [2] a lot, since it is freely available for everybody.

This is a citation to a real paper [3]. And this is how I cite Wikipedia [4].

Note that:

- I use a BibTeX style (\*.bst) that I hacked together from number.bst, but where I made sure urls can be used. The original was by Patrick W. Daly, but I can't seem to find the original and hence what exactly it is I changed...
- I can use more than one BibTeX file (\*.bib)
- Only the entries from my BibTeX files that are *actually cited* are listed in the bibliography.

## Bibliography

- [1] **Choudhary, V.** *C Programming Language Cheat Sheet*, 2019. URL <https://developerinsider.co/c-programming-language-cheat-sheet/>. Visited 2019-03-22.
